

Log Profile Options

CONTOUR LOG PROFILE

The Contour profile is contoured on both interior and exterior and is often referred to as a “Double D Log” in the log home industry. Our most popular, and also our standard, this profile features a traditional round log look with a uniform, more tailored appearance and our Mortise-and-Tenon corners.

Also available in an optional hand-peeled finish.

V-GROOVE LOG PROFILE

The V-Groove profile is contoured on the exterior, v-grooved on the interior and is often referred to as a “D-Log” in the log home industry. The interior walls will have a horizontal tongue-and-groove look. Corner options include our Mortise-and-Tenon, Dovetail or Square.

Also available with an optional hand-peeled finish.

SWEDISH COPE LOG PROFILE

Swedish Cope is a uniform, round profile that is massive and “western”. It incorporates the traditional saddle-notch corner treatment and is available in 9”, 10”, and 12” log diameters.

RUSTIC LOG PROFILE

The REAL LOG HOMES original Rustic profile creates a “classic” log home look. Featuring random diameter logs of 8” to 11” and our Mortise-and-Tenon corner, the Rustic profile is a great choice for a log home or cabin in a bucolic setting.

CLASSIC APPALACHIAN LOG PROFILE

The Classic Appalachian profile features a v-grooved interior and is flat with an aesthetic chinking groove on the exterior. Corner options include Dovetail or Square.

TRADITIONAL CLAPBOARD PROFILE

With a traditional clapboard exterior, this profile has the benefits of solid 8”x8” timber construction and features a contemporary square corner treatment. Available in a standard 8” profile (3 ½” reveal).

MORTISE-AND-TENON CORNER - FEATURING REAL LOG HOMES® INTERLOCK™ JOINERY SYSTEM

Available with Contour profiles (8"x7" and 8"x8"), V-Groove profiles (8"x7", 8"x8" and 8"x12") and Rustic profile.
